

PROFESSIONAL SUMMARY

Results-driven Technical Lead .NET Full-Stack Engineer with over +10 years of experience delivering scalable enterprise applications using .NET and Angular. Proven expertise in system architecture, clean code practices, and agile methodologies. Adept at leading cross-functional teams, mentoring engineers, and implementing robust software solutions across monolith and microservice environments. Passionate about continuous learning, architecture best practices (DDD, TDD, CQRS, Clean Architecture, Clean Code, SOLID Principles, Design Patterns, DevOps), and driving team success. Passionate about writing clean, maintainable code and driving continuous improvement through mentoring and code reviews. Recognized for the ability to take ownership of complex systems, streamline development workflows, and align technical solutions with business goals. Strong engineering professional with a Bachelor's Degree focused in Information Systems Department from Faculty of Computers and Information Science (Good grade), Asyut University, Egypt.

SOFT SKILLS

Problem Solver, Fast Learner, Team-Oriented, Self-Motivated, Organized, Adaptable, Planning & Time Management, Team Management, Team Building, Leadership, Ability to handle multitask, Analytical thinking, Ownership, Communication Skills

TECHNICAL SKILLS

Backend: C#, OOP, .NET 4.x, .NET Core, .Net Standard, .NET Aspire, ASP.NET WebForms / MVC / Web API / Core, Web Services, Windows Services, CQRS, MediatR, Multi-Tenant SaaS, Auditing, Caching (InMemory, Distributed, Hypride).

APIs: Controller API, Minimal API (Carter), RESTful, API Versioning, gRPC, GraphQL, Middlewares, Action Filters.

Frameworks: ABP Framework, ASP.NET Boilerplate.

ORM / Database Access: Entity Framework, EF Core (Code First, Database First, Fluent API), Dapper (Micro-ORM), ADO.NET, LINQ (Objects, Entities, XML).

Background Jobs: Hangfire, Quartz.

Logging: Serilog, NLog, Seq (Structured), ElasticSearch + Kibana (Centralized / Visualization).

Kamel Mikhaeil Kamel Danial

Technical Lead Full Stack .NET

Address: 4 Mohamed Al-Durrah St. Branching from Al-Rawda, Alnuzha, Cairo, Egypt

EDUCATION

B.S Degree, Computers and Information Science, Asyut University, Egypt

September 2008 – July 2013

Degree: Bachelor's Degree in Information Systems Department.

Project: Web Marketing Project (PHP, HTML, CSS, JavaScript, jQuery and Webbot).

Project Grade: Excellent.

Overall Grade: C - 69.98%.

Mubarak Secondary School, Asyut, Egypt

September 2005 – July 2008

Field of study: Math Field.

Overall Grade: A - 90.24%.

WORK EXPERIENCE

SmartTech 3S Solutions – Cairo, Egypt

Technical Lead Full Stack (.NET & Angular)

March 2025 – Now (Full Time)

January 2024 – March 2025 (Part Time)

- Lead and manage a team of .NET developers to deliver high-quality and scalable software solutions. - Participate in system design, architecture, and development planning. - Wrote robust unit and integration tests (xUnit, NSubstitute, FluentAssertions, Test containers). - Ensure coding standards, best practices, and quality assurance processes are followed. - Provide technical guidance, mentorship, and code reviews for team members. - Collaborate with Business Analysts, Project Managers, and QA teams to ensure project success. - Handle task assignments, workload distribution, and performance & quality monitoring. - Reduce application's deployment time to be just minutes instead of hours by using CI/CD pipelines using Azure DevOps and Containerization. - Reduce bugs, issues and side effect by 80% by using Unit and Integration tests.

Projects: Smart-Workflow, Smart-CMS.

Tahaluf Al Emarat Technical Solutions – Cairo, Egypt

Senior Full Stack Engineer (.NET & Angular) (Act as Tech Lead)

July 2023 – March 2025 - Architected and led development of scalable .NET Core and Angular applications. - Wrote robust unit and integration tests (xUnit, NSubstitute, FluentAssertions and Test Containers). - Develop multi-tenant application (SaaS). - Research and development. - Delivered R&D solutions in microservices. - Fix bugs and issues. - Mentored junior/senior developers. - Managed team tasks, sprint planning, and code reviews. **Projects:** IDify Wrokflow, JoPerso.

ASGATech – Cairo, Egypt

Senior Full Stack Engineer (.NET & Angular) (Act as Tech Lead)

July 2022 – July 2023 - Developed Full-Stack features using RESTful APIs (Backend) and Angular (Frontend) and Firebase Messaging Cloud (FMC). - Fix bugs and issues. - Publish and Deploy application in IIS. - Led Microsoft Azure Cloud deployments using Filezilla. - Build real time notification using Firebase Messaging Cloud. - supported junior/senior developers. - supported frontend/mobile teams. **Projects:** Historical Palaces, Wafi, Sawaeid.

Security: Authentication & Authorization (Microsoft Identity, JWT, OAuth, OpenId Connect, Identity Server, CORS).

Testing: TDD, xUnit, Fluent Assertions, Mock, NSubstitute, Unit Testing, Integration Testing (Test Containers), Architecture Test using NetArchTest.Rules.

Frontend: Angular 2+ / CLI / Material, PrimeNG, Bootstrap, Kendo UI, Telerik Reporting, JavaScript, TypeScript, HTML, CSS, jQuery, Ajax, React.js, Blazor, MudBlazor.

Architecture & Patterns: Clean Architecture, Monolith, Modular Monolith, Microservices, Domain-Driven Design (DDD), N-Tier & 3-Tier Architectures, SOLID Principles, Vertical Slice, API Gateway (Ocelot, YARP), Dependency Injection, Design Patterns, Repository, Unit of Work, Event-Driven Architecture and MVC.

DevOps & Tools: Azure DevOps, Docker, Kubernetes, IIS, CI/CD, SonarQube, Swagger, Postman, Insomnia, TFS, Git, Github Actions, MinIO, OnePass, Cartero, Microsoft Azure, AWS, Firebase.

Databases: SQL, SQL Server, NoSQL (MongoDB), Redis, Firebase, Elasticsearch.

Cloud: Microsoft Azure (App Services), AWS (S3, SQS, SNS), Firebase (Realtime DB & Notification).

Message Broker: RabbitMQ + MassTransit, Apache Kafka.

AI Tools: ChatGPT, GitHub Copilot, Google Gemini, Cursor

Basic Knowledge: PHP, Java, Python, Django, Node.js, Android, iOS, Flutter, Vue.js, Microsoft Dynamics 365.

CERTIFICATES

Udemy: 1) Introduction to Cloud Computing on AWS for Beginners. 2) RabbitMQ .NET 6 From Zero To Hero in Arabic. 3) Redis with .Net 6 in Arabic. 4) Clean Architecture in .NET Core MVC[.NET 8] Complete Guide. 5) Docker from Zero to hero (Arabic). 6) Build an app with ASP.NET Core 5 and Angular 10 from scratch. 7) Getting started With Microsoft Azure. 8) Angular: ASP.NET Core Overview. 9) Complete ASP.NET Core and Entity Framework Development. 10) ASP.NET Zero Framework (.NET Core & Angular).

3S Software(Secured Smart System) – Cairo, Egypt

Senior Full Stack Engineer (.NET & Angular) (Act as Tech Lead)

January 2021 – July 2022 - Developed Full-Stack features using RESTful APIs (Backend) and Angular/React.js (Frontend). - Set projects architecture (Backend & Frontend). - Code review. - Fix bugs and issues. - Integrate with SSRS Reporting Service. - Publish and Deploy application in IIS and Azure App Service. - Build Ocelot API gateway. - Mentored junior/senior developers. - Managed team tasks, sprint planning, and code reviews. **Projects:** WE Portal.

Unicom – Cairo, Egypt

Senior Full Stack Engineer (.NET & Angular)

November 2019 – January 2021 - Developed .NET Web MVC and Full-Stack features using RESTful APIs (Backend) and Angular (Frontend). - Fix bugs and issues. - Publish and Deploy application in IIS. - supported junior developers. - supported frontend / mobile teams. **Projects:** Licenses System, Archiving, Projects Management, Employee Attendance System, Queuing System, Scientific Researches, Lockups Module, Localization Module

ITG Solutions – Cairo, Egypt

Mid-Level Software Engineer (.NET)

August 2018 – November 2019 - Developed .NET Web MVC and RESTful APIs. - Fix bugs and issues. - supported junior developers. **Projects:** JIC, MoA

SMART Software House – Cairo, Egypt

Junior Software Engineer (.NET)

July 2017 – July 2018 - Develop web applications (Web Forms and MVC). - Fix bugs and issues. **Projects:** AEC, Smart Church, Smart HR Portal, Le Genie (e-Learning)

Junior Software Engineer (.NET) – Cairo, Egypt

Freelance (Self-employed)

March 2015 – July 2017

Military Service – Egypt Armed Forces

January 2014 – March 2015 - Complete Military Service.

GITHUB PROJECTS

Microservices e-Shopping

- Description: Microservices on .NET platforms used ASP.NET Web API, Docker, RabbitMQ, MassTransit, Grpc, Ocelot API Gateway, PostgreSQL, Redis (Distributed Caching), Sql Server, Entity Framework Core, CQRS, MediatR, DDD, Vertical Slice and Clean Architecture implementation with using latest features of .NET 9 and C#.

- Repo: <https://github.com/kamelmikhael/Microservices.eShopping>

Clean Architecture .NET 9 (Minimal Api)

- Description: Clean Architecture Template using .NET 9, C#, SOLID Design Principles, Software Design Patterns, Background Jobs, Minimal Api, RabbitMQ, Entity Framework (EF) Core, Unit Testing, Integration Testing, Redis (Distributed Caching), Domain-Driven Design (DDD), JSON Web Token (JWT), CQRS, API Gateways (YARP), Clean Architecture.

- Repo: <https://github.com/kamelmikhael/CleanArchitectureDotNet9>

Clean Architecture .Net 7 (Controllers)

- Description: A starting point for Clean Architecture with .NET 7, C# ASP.NET Web API, Software Design Patterns, Entity Framework (EF) Core, Unit Testing, Integration Testing, Domain-Driven Design (DDD), Clean Architecture, CQRS, MediatR

- Repo: <https://github.com/kamelmikhael/CleanArchitectureDotNet7-2023>

DatingApp

- Description: Full Stack Web application build using C#, .NET Core, Web API, Clean Architecture, SignalR, CQRS, MediatR, TypeScript and Angular.

- Repo: <https://github.com/kamelmikhael/DatingApp>

Pluralsight: 1) Domain Driven Design in Practice. 2) Node.js for .NET Developers. 3) Getting started with SignalR (Pluralsight). 4) Authentication & Authorization in ASP.NET. 5) Blazor .NET Core 3.1.

PiTechnologies: 1) ISTQB Certified Tester. 2) EduEgypt Program iOS Certificate.

and more Certifications you can see on my LinkedIn profile

HOBBIES

Study/Learn New Technologies, Reading, Coding, Watching English Movies, Bing Bong, Football.

LANGUAGES

Arabic: Native.

English: Advanced (Professional Proficiency).

References and Documentations will be available upon request.

Thank you for spending your time reading my CV.

Reactivities

- Description: Full Stack Application build with C#, .NET Core, Web API, Clean Architecture, SignalR, CQRS, MediatR, TypeScript, React.js, MobX (State Management)
- Repo: <https://github.com/kamelmikhael/Reactivities>

Modular Monolith (Demo)

- Description: Modular Monolithic Architecture Demo build with C#, .NET Core, Web API, Modular Monolith Architecture.
- Repo: <https://github.com/kamelmikhael/modular-monolith-aspnet-core-sample>

RESPONSIBILITIES

- Architected and led development of scalable .NET Core | Angular | React.js | Blazor applications.
- Set Project Architecture (Backend, Frontend).
- Publish and deploy Applications on local and client servers.
- Wrote robust unit and integration tests (xUnit, NSubstitute, FluentAssertions and Test Containers).
- Develop multi-tenant application (SaaS).
- Conduct code reviews and ensure adherence to best practices (SOLID, clean code, system design).
- Distribute and prioritize tasks across the team based on sprint goals and business priorities.
- Delivered R&D solutions in microservices.
- Mentored and lead technical team of junior/mid/senior developers.
- Represent the tech team in stakeholder and client meetings, discussing requirements, technical feasibility, and delivery timelines.
- Meeting with technology managers to determine application and system requirements.
- Experience and ability to create systems from scratch, as well as upgrading current systems
- Analyzing system requirements and delegating development tasks.
- Developing technical specifications and documentations.
- Writing scalable code for .NET software applications.
- Reviewing and debugging .NET applications.
- Stay up to date with the latest .NET technologies and industry trends.

Worked on a variety of project's types include:

- E-Marketing (Webbot Web Application)
- Content Management System (Web Application)
- ERP systems (Desktop)
- E-learning (Le Genie Web Application)
- Smart HR Portal, Smart Church (ERP Web Application)
- E-services platform (AEC, MoA, JIC Web Application)
- Microservices (Authentication & Authorization, Lockups Module, Localization Module, Encryption/Decryption), E-Shopping Microservices (Udemy Online Course 30 hours).
- Queuing System, Employees Attendance System, Project Management Web Applications.
- Organization's Internal Systems Web Applications.

and more you can see on my LinkedIn profile
